

Amendments to the Claims (this listing replaces all prior versions):

1. (currently amended) A method comprising
providing, to a user of a control device, an indication of a value ~~currently~~
representative of a current preset ~~associated with a~~ sound signal source,
simultaneously providing an indication of a ~~possible new value of a possible new~~
the preset associated with ~~representative of a different the~~ sound signal source and
providing the user with an edit option allowing the user to then change the current
value to the new value.
2. (currently amended) The method of claim 1 in which the preset is associated with ~~works~~
performed by a sound signal source in a multi-media system.
3. (previously presented) The method of claim 2 in which the multi-media system
comprises an audio system.
4. (original) The method of claim 1 in which the indications comprise graphical items on a
display.
5. (original) The method of claim 4 in which the display is part of the control device.
6. (original) The method of claim 1 also including enabling a user to confirm the possible
new preset value.
7. (original) The method of claim 5 in which the control device communicates with a
second device to effect the confirmed new preset value.
8. (original) The method of claim 1 in which the value comprises an identifier of a station.
9. (currently amended) A method comprising
enabling a user of a control device
to indicate a ~~possible new value of a possible new~~ preset of a sound signal
source and
to separately confirm the indication, and,
while the new value has been indicated but before the indication has been
confirmed, ~~changing to change~~ an operation of another device in accordance with
the indicated possible new value.

10. (original) The method of claim 9 in which the value comprises an identifier of a station.
11. (previously presented) The method of claim 10 in which the station comprises a radio station and the another device comprises a radio receiver.
12. (currently amended) The method of claim 9~~1~~ in which the sound signal source comprises a source of items to be performed, the source being configured to store the items for performance in response to the preset.
